Frontend Developer

PROFILE

I am an enthusiastic frontend developer skilled in web development, focused on creating user-friendly, responsive, and visually appealing applications. I prioritize clean, readable, and efficient code while staying updated on industry trends. Experienced in agile teams, I communicate and collaborate effectively with designers, backend developers, and project managers.

WORK EXPERIENCE

Masaryk University

Frontend Developer
April 2023 - Present

Development of the [MUNI HELPS](#) application utilizing React and React Native

- Establishing cross-platform compatibility (Web, Android, iOS)
- Integrating native APIs and modules (Notifications, RN WebView communication bridge)
- Sustaining RESTful communication with the backend
- Achieving 100% accessibility
- OAuth and OIDC integration
- Successful migration of ~50K lines of code from JavaScript to TypeScript
- Developing unit and integration tests using Jest and Cypress achieving 85% code coverage
